## WILD BILL AND **BURNING MOSCOW**

These Mines Are Landed by A. B. Lewis at a Cost of \$150,000.

NEW KLONDIKE GOLD ORE

IMPERIAL COMPANY BUYS VAL-UABLE SPRINGS.

properties in Beaver county, a bond upon which has been exercised by the Wild Bill Mining company, were yesterday added to the holdings of the new B. Lewis, who secured the mines from the original owners, the Messrs. Cullen and Barrett, who jointly negotiated the sale of the Burning Moscow, while Mr. Cullen alone closed up on the Wild Bill. The consideration was not made public,

000 and \$200,000.

The Wild Bill company, which for a time exercised a bond on the properties and mined considerable very high-grade ore, proved not strong enough to develop the mines and meet the purchase be equipped with machinery and a com-petent corps of miners will begin their systematic development without delay. They have been great producers in the past and that with only the smallest portion of the veins having been opened and mined. With money to open them up properly and expert talent to direct

time. From the latter he has samples of ore that run as high as 75 per cent copper, with accompanying values in silver and gold, and of this character of ore more is daily being exposed.

During his trip south he took a run over to Pioche and into the new Klondike gold district where, with E. F. Freudentha!, he has secured what appears to be a secured what appea

The new district is only about four-teen miles from Modena, and the ledges are undoubtedly the same as those found at Fay, to the north, the one closely resembling that found in Grant Smith's Irus property at the latter camp. There is considerable excitement in the new district and ground has been ocated in all directions. eated in all directions

VALUABLE WATER PURCHASE. Imperial Company Secures the Antelope Springs in Beaver County.

auxious to kain them the past the past will not be long till the company will the water and need it badly. The e itself will most likely develop sufnt water for concentrating purposes the time a mill is needed, but water bollers, household and other purposes very scarce article in that neighbor-

### NOW IN THE CONTACT. Conditions at the Minola Are Favor-

able to an Ore Body.

able to an Ore Body.

Manager A. H. Mayne will go out to the Park today and take a look at the latest developments in the Miñola company's ground. The winze from the tunnel level has now penetrated the lime hanging wall country and at last reports was fifteen feet or more into the ledge. Clinging to the lime was three or more test of iron and under that a mixture of mineralized quartz and lime encountered. As sinking progressed it was getting better in appearance, with every indication that ore would be found when, if not before, the footwall was reached. The Minola company has done a great deal of work to demonstrate that the Silver King contact was to be found in its territory and from reports received the connection has at last been made. If an ore chute is not tapped in sinking through to the footwall, drifting will commence. It therefore seems to be only a question of time, now, till the property is converted into a producer, with every likelihood that it will be a big one.

an ore chute is not tapped in sinking through to the footwall, drifting will commence. It therefore seems to be only a question of time, now, till the property is converted into a producer, with every likelihood that it will be a big one.

STRIKE NEAR THE GLENCOE.

Good Ore Reported in Winze on the Harwood-Reynolds Property.

A letter from Manager John Harwood of the Harwood-Reynolds company's property, near the Glencoe, at Park City, brought the information Friday night that good ore had been encountered in the winze from the tunnel level. The information was sent to John Paradise, and to see what the strike amounts to he will go out to camp this morning. Developments have been pregressing all winter and those best acquainted with the ground have been pregressing all winter and those best acquainted with the ground have been pregressing all winter and those best acquainted with the ground have been predicting right along that a mine would be uncovered there. In the same vicinity the East Blue Ledge company has also been actively driving a tunnel for the Glencoe vein since last fall and the time is drawing near when a strike should be recorded there, also.

ORE AND BULLION.

## ORE AND BULLION.

Past Week's Production Has Been an

Past Week's Production Has Been an Unusually Heavy One.

The ore and bullion settlements in the local open market during the past week, as reported by McCornick & Co., were unusually heavy, the total reaching \$497.

500. Of this sum the settlements made yesterday amounted to \$64,500, as follows:

Silver, lead, gold and copper ores, \$44.700; hase bullion, \$19.800.

The independent valley smelters sent to market an aggregate of \$65.263 pounds of copper bullion, containing fine values in gold and silver, as well as the red metal. The Utah Consolidated contributed to the total 245.000 pounds, the Bingham Consolidated 240.000 and the United States plant 120,263 pounds.

GOLD MOUNTAIN MINES.

Mills Are Building, Strikes Being Made and Deals Pending.

Richfield, June 6.—With the release of the greater part of Gold mountain from the showy mantle which has covered it dince last November, is beginning a sealon of work and development that withan tiquestion will be the greatest and most more results after the mile will be the greatest and most more results as the mile will be the greatest and most more results after the mile will be the greatest and most more results after the mile will have arrived at the company's property.

Very hard rock is super the mile will save a first the same economical manner, and if the plant does not make good money every sign will have failed. The mill will begin treating ore by tomorrow or next day, by which time President and productive of the most far.

Very hard rock is super the new mile will have arrived at the company's property. Mills Are Building, Strikes Being Mills Are Building, Strikes Being

Made and Deals Pending.

Richfield, June 6.—With the release of the greater part of Gold mountain from the snowy mantle which has covered it since last November, is beginning a season of work and development that without question will be the greatest and most important and productive of the most farreaching results since the mineral belt of Mt. Baldy took its place upon the mining map of Utah. The snow now having receded sufficiently to permit claimowners to get onto their properties and to allow supplies and machinery to be taken in, the camps are livening up rapidly and are once more becoming the scenes of a great deal of activity.

One of the mest important undertakings right now is the efection of a new mill on the old Sevier ground by the Sevier Consolidated Mining, Milling & Prospecting company. Captain H. C. Lawrence, general manager, and Charles W. Foster, who is superintending the construction of the mill and installation of the machinery, were in town this week and report that the work is progressing satisfactorily. The machinery is being received in carload lots nearly every day and the mill will soon be ready for its new equipment. The new plant is located adjoining the old stamp mill erected by Charles Lammersdorf years ago. The new mill with treat ores in a principle similar to that of the Annie Laurie, but not by exactly the same process. It will be a little different from anything in this part of Utah. The plant will have a minimum capacity of firity tons per day. In the old Sevier mine is an immense body of very rich ore already blocked out, so that the mill can run continuously after it is put in operation.

### MOUNTAINS OF COPPER ORE. Developments West of Mackay Are

one of the mest important undertakings right now is the erection of a new mill on the old Sevier ground by the Sevier Consolidated Mining, Milling & Prospecting company. Captain H. C. Lawrence, general manager, and Charles W. Foster, who is superfittending the consecution of the work is progressing satisfactority. The machinery is being received in carload lots nearly every day, and the mill will soon be ready for its new equipment. The mexplaint is located adjoining the old stamp mill erected by Charles Lammersdorf years ago. The new mill with treat ores in a principle similar to that of the Annie Laurie, but not by exactly the same process. It will be a little that of the Annie Laurie, but not by exactly the same process. It will be a little that of the Annie Laurie, but not by exactly the same process. It will be a little that of the Annie Laurie, but not by exactly the same process. It will be a little that of the annie rouse of the same process. It will be a little that of the annie rouse of the same process. It will be a little that of the annie rouse of the same process. It will be a little that of the annie Laurie, but not by exactly the same process. It will be a little that of the annie has been current for a couple of years past appear to have more foundation in fact this spring than ever before. Manager James Long is the work actually undertaken.

In the neighborhood of Kimberly development work has been imaugurated on nearly all the claims. Recent work at the Holland has brought to light some fine gold ores, and the management will push development energetically. This proposition has produced considerable good or since work was first started the Holland has brought to light some fine gold ores, and the management will push development of the property in an amaner that will be productive of results happy to the camp and the owners.

Since the transfer of Dr. J. C. Peterson's interest in the Trapper's Fride and the elimination of friction in the management of this property in a manner that will be pr Proving Up Big Mines.

at Park City is going to furnish some sensations in mining circles this summer. If you get in now you will make money. The Lone Pine, the St. Louis-Vassar and the Park City Gold & Silver Mining Co. have each got high-grade ore, and some, if not all these properties, will become dividend-payers before long. REMEMBER THIS. And then there is the Rochester and southern tier. Take a trip out there and examine these properties. They are all open for inspection, and you will be surprised at the ore in sight. If you can't go personally, send some expert in whom you have confidence. Don't delay. This is a chance to make money.
